Our Report Cards

The United Nations Global Goals for Sustainable Development came into force in January 2016. Through these 17 interconnected goals, national governments and the international community pledged to work together to end poverty, protect the planet and ensure that all people enjoy peace and prosperity by 2030. The Goals are underpinned by a pledge to 'Leave No One Behind', meaning that their very success is dependent on reaching and supporting the most vulnerable and marginalised people.

We know that progress for those left furthest behind is unlikely to be captured in official, national-level data, particularly while existing data collection efforts struggle to gather accurate or sufficiently disaggregated data. That is why it is important that alternative forms of data, including from NGOs, is shared and included in analysis to provide a more nuanced picture of our collective progress.

With this in mind, Women for Women International has committed to using the Sustainable Development Goals as a framework for sharing the data we collect from our programme and to share our contribution towards the implementation of the Goals.

As acknowledged by the Goals, the lived experience of marginalisation is multidimensional and interlinked - it is not defined by earnings alone. The data presented here reflects the complexity of leaving no one behind and how marginalisation affects women living in conflict in every aspect of their lives.

By sharing this data, we aim to highlight the lack of progress for women survivors of war and to emphasise the importance of investing in the most marginalised to ensure that no one is left behind.

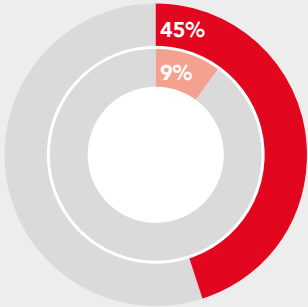

Our Data from Nigeria

Women for Women International routinely administers rigorous baseline and endline surveys to a geographically representative sample of enrolled participants to gauge women's progress through the programme. We collect data from 30-60% of women participants at enrolment (baseline) and, 12 months later, at graduation (endline). In 2016, we revised our data collection methods to strengthen the quality of the data we receive.

Data presented here was gathered from 1,435 participants at both baseline and endline, representing 41% of all women who graduated from our programme in Nigeria in 2018 (January - December).

We also present the 'percentage change' which is the amount of change as a proportion of the starting point (our baseline findings). We use this method as a way of understanding the magnitude of a change relative to a baseline figure.

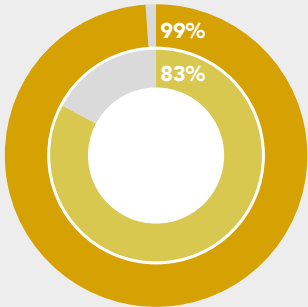

The data we collect focuses exclusively on marginalised women survivors of conflict and therefore is not nationally representative. It does, however, provide a snapshot into the lives of the women we serve and can provide insight into working with hard-to-reach groups.

	Global Goal and selected target (by 2030)	Our indicator	Percentage change
	Goal 1: End poverty in all its forms everywhere		
	<p>1.1 Eradicate extreme poverty (people living on less than \$1.25 a day).</p>	<p>Share of women participants who report personal earnings of at least \$1.90 a day (in current USD purchasing power parity).¹</p>	 <p>■ At graduation (2018) ■ At enrolment (2017)</p> <p>400% ↑</p>
<p><i>In Nigeria, it is estimated that around 50% of the population live in extreme poverty. This data shows that with investment and support, marginalised women are able to lift themselves out of poverty and provide more stability for their families.²</i></p>			

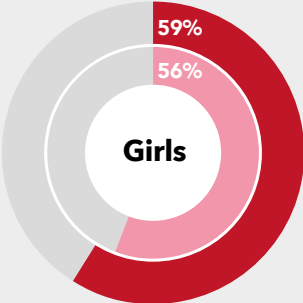

1. \$1.90 a day is the international extreme poverty line set by the World Bank.

<p><i>Our programme provides women with knowledge and skills to both earn and save money. The women we serve live in fragile contexts so saving money is important to building women's resilience to economic shocks and protecting their families financially.</i></p>

	Goal 2: End hunger, achieve food security and improved nutrition and promote sustainable agriculture		
	<p>2.1 By 2030, end hunger and ensure access by all people, in particular the poor and people in vulnerable situations, including infants, to safe, nutritious and sufficient food all year round.</p>	<p>Share of women who report no food shortage in the last 4 weeks.</p>	 <p> ■ At graduation (2018) ■ At enrolment (2017) </p> <p>19% ↑</p>
<p><i>Food security is a key indicator of wellbeing and decreasing poverty. Food security is not just about having access to enough food but also nutritious food. Nutrition is a key part of our training, supporting women and their family's health and wellbeing.</i></p>

	Goal 3: Ensure healthy lives and promote well-being for all at all ages		
	<p>3.7 By 2030, ensure access to sexual and reproductive health-care services, including family planning, information and education.</p>	<p>Share of women participants who report practising family planning.</p>	
<p><i>The significant increase in the number of women practising family planning is extremely encouraging. As well as supporting women to know their reproductive rights, our programme supports women to have greater decision-making power (which we see in Goal 5.6), access to referral services such as access to contraceptives and increase their self-efficacy (which we see in 5.1) - all of which contribute to the increase in women who practise family planning.</i></p>		<p>■ At graduation (2018) ■ At enrolment (2017)</p> <p>460% ↑</p>

<p><i>Self-efficacy measures women's perceptions of self-confidence, future outlook and capacity to follow through with life goals. Using a set of questions commonly used in women's empowerment research studies, we present self-efficacy as a score on a scale of 0-1, where 1 indicates the highest possible level of self-efficacy.</i></p>

	Goal 16: Promote just, peaceful and inclusive societies		
	<p>16.7 Ensure responsive, inclusive, participatory and representative decision-making at all levels.</p>	<p>Share of women who discussed community issues with other women in community.</p>	 <p> ■ At graduation (2018) ■ At enrolment (2017) </p> <p>31% </p>

In countries affected by conflict and war, Women for Women International supports the most marginalised women to earn and save money, improve health and well-being, influence decisions in their home and community, and connect with networks for support. By utilising skills, knowledge and resources, she is able to create sustainable change for herself, her family, and community.
