Our Report Cards

The United Nations Global Goals for Sustainable Development came into force in January 2016. Through these 17 interconnected goals, national governments and the international community pledged to work together to end poverty, protect the planet and ensure that all people enjoy peace and prosperity by 2030. The Goals are underpinned by a pledge to 'Leave No One Behind', meaning that their very success is dependent on reaching and supporting the most vulnerable and marginalised people.

We know that progress for those left furthest behind is unlikely to be captured in official, national-level data, particularly while existing data collection efforts struggle to gather accurate or sufficiently disaggregated data. That is why it is important that alternative forms of data, including from NGOs, is shared and included in analysis to provide a more nuanced picture of our collective progress.

With this in mind, Women for Women International has committed to using the Sustainable Development Goals as a framework for sharing the data we collect from our programme and to share our contribution towards the implementation of the Goals.

As acknowledged by the Goals, the lived experience of marginalisation is multidimensional and interlinked - it is not defined by earnings alone. The data presented here reflects the complexity of leaving no one behind and how marginalisation affects women living in conflict in every aspect of their lives.

By sharing this data, we aim to highlight the lack of progress for women survivors of war and to emphasise the importance of investing in the most marginalised to ensure that no one is left behind.

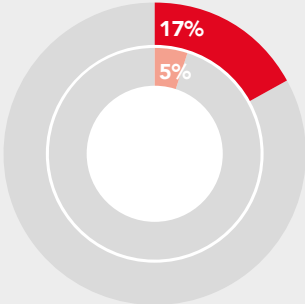

Our Data from Afghanistan

Women for Women International routinely administers rigorous baseline and endline surveys to a geographically representative sample of enrolled participants to gauge women's progress through the programme. We collect data from 30-60% of women participants at enrolment (baseline) and, 12 months later, at graduation (endline). In 2016, we revised our data collection methods to strengthen the quality of the data we receive.

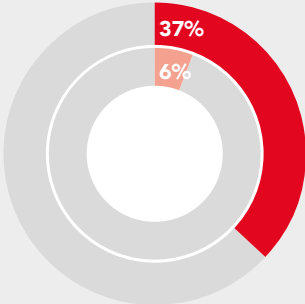

Data presented here was gathered from 2066 participants at both baseline and endline, representing 42% of all women who graduated from our programme in Afghanistan in 2018 (January - December).

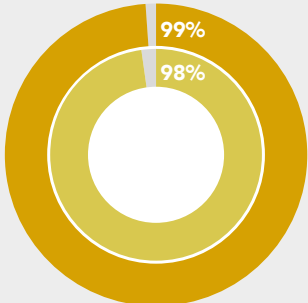

We also present the 'percentage change' which is the amount of change as a proportion of the starting point (our baseline findings). We use this method as a way of understanding the magnitude of a change relative to a baseline figure.

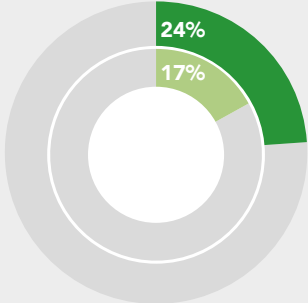

The data we collect focuses exclusively on marginalised women survivors of conflict and therefore is not nationally representative. It does, however, provide a snapshot into the lives of the women we serve and can provide insight into working with hard-to-reach groups.

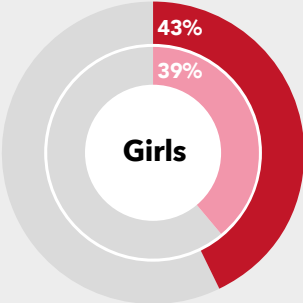

| | Global Goal and selected target (by 2030) | Our indicator | Percentage change |
|--|--|--|---|
|  | Goal 1: End poverty in all its forms everywhere | | |
|  | 1.1 Eradicate extreme poverty (people living on less than \$1.25 a day). | Share of women participants who report personal earnings of at least \$1.90 a day (in current USD purchasing power parity). ¹ |  <p> ■ At graduation (2018) ■ At enrolment (2017) </p> <p>240% ↑</p> |
| | <p><i>In Afghanistan, over half the country lives below the poverty line. We specifically target the most marginalised women for our programme. We can see from this data that a large number of the 2018 graduates entered our programme living in poverty. The increase of women living above the poverty line at graduation is extremely encouraging, especially in the fragile context they are living in.</i></p> | | |

1. \$1.90 a day is the international extreme poverty line set by the World Bank.

|  | Goal 1: End poverty in all its forms everywhere | | |
|  | <p>1.5 By 2030, build the resilience of the poor and those in vulnerable situations and reduce their exposure and vulnerability to climate related extreme events and other economic, social and environmental shocks and disasters.</p> | <p>Share of women participants who report saving a portion of their earnings.</p> |  <p>■ At graduation (2018) ■ At enrolment (2017)</p> <p>517% ↑</p> |
| <p><i>Through our programme, women we work with are for the first time in control of an amount of their own money (through earnings or stipend). Our programme supports women to learn good savings habits and mechanisms for saving in order for women to move away from hand-to-mouth financial management. This is especially important in Afghanistan where the majority of women are charged with household financial management (for example, buying food for their family).</i></p> | | | |

Women for Women International graduates working on crochet in Afghanistan. Our year-long programme supports women to learn a marketable job skill, such as crochet, and provides business training so that women can turn their chosen skill into a stable income.

In countries affected by conflict and war, Women for Women International supports the most marginalised women to earn and save money, improve health and well-being, influence decisions in their home and community, and connect with networks for support. By utilising skills, knowledge and resources, she is able to create sustainable change for herself, her family, and community.
